Dear Ms. Barajas,

It is extremely upsetting to my family that we are ingesting pesticides and herbicides that we are unaware. Many of these toxins are hidden in foods eaten every day by children in our homes, schools and day cares. It is a silent killer. At the very least, they are making our nation one very sick nation!

Gyphosate has been shown to do great damage to our livers. No long term, independent study has ever been done to show there is any hope for those of us (the entire country!) who have ingested it without knowing it.

The only safe level is ZERO!!!

Let us pick up our pieces and save the environment and our children. Let's get rid of Gyphosate once and for all. No Gyphosate is the only safe Gyphosate.

Here's to ridding our planet of Gyphosate!!!

Mrs. Marilyn Angeli

May you have a blessed day!
